Advertisements — CALIFORNIA MEDICINE is published the first week of each month. Advertising copy must be received not later than the first of the month preceding issue. Advertising rates will be sent on request. Acceptance of advertising is contingent upon approval by the Advertising Committee.

ADVERTISING MANAGER MELVIN B. TYLER

Copyright, 1971, by the California Medical Association.

Subscription prices, \$8 (\$9 for foreign countries); student subscriptions \$4; single copies 80 cents.

Volumes begin with the first of January and the first of July. Subscriptions may commence at any time.

Change of Address — Requests for change of address should give both the old and new address, and should be made by county secretaries or by the member concerned.

Contributions of Scientific and Original Articles

Responsibilities for Statements and Conclusions in Original Articles — Authors are responsible for all statements, conclusions and methods of presenting their subjects. These may or may not be in harmony with the views of the editorial staff. It is aimed to permit authors to have as wide latitude as the general policy of the Journal and the demands on its space may permit. The right to reduce, revise or reject any manuscript is always reserved.

Exclusive Publication — Articles are accepted for publication on condition that they are contributed solely to this Journal. Ordinarily contributors will be notified within 60 days if a manuscript is accepted for publication. Every effort will be made to return unused manuscripts.

Length of Articles — Ordinarily articles should not exceed 3,000 words (approximately 5 printed pages). Under exceptional circumstances only will articles of over 4,000 words be published.

Manuscripts — Manuscripts should be typewritten, double spaced and the original typescript plus one copy submitted.

Illustrations — Ordinarily publication of 2 or 3 illustrations accompanying an article will be paid for by CALIFORNIA MEDICINE. Any number beyond this will have to be paid for by the author.

References — Should conform to the following order: name of author, title of article, name of periodical, with volume, inclusive pages, month, and year—i.e.: Lee GS: The heart rhythm following therapy with digitalis. Arch Int Med 44:554-562, Dec 1942. They should be listed in the order in which they are cited in the text and numbered in sequence.

Reprints — Reprints must be paid for by the author at established standard rates.

Contributions of "Letters to the Editor"

The Editorial Board will be glad to receive and consider for publication letters containing information of general interest to physicians throughout the State or presenting constructive criticisms on controversial issues of the day.

"Entered as second class matter at the post office in San Francisco and additional mailing offices under the Act of March 3, 1879." Acceptance for mailing at special rate of postage provided for in Section 1103, Act of October 3, 1917, authorized August 10, 1918.

THE MISLEADING EEG SOON AFTER SEIZURE

"If you admit a child in febrile convulsions, status epilepticus, or prolonged focal fit, . . . your natural inclination is to order an EEG on him. But in a high percentage of cases, this will provide misleading information. The EEG records are often very slow, in a diffuse or focal way. Frequently you find misleading slow activity whereas if you wait a week—I'd say a week to ten days at least—you find a more representative kind of record. In other words, the first abnormality is simply a reflection of the insult to the brain of whatever happens during a severe seizure—whether it's anoxia, cerebral shock, or whatever you want to call it. The information is misleading. A week later you might find a petit mal kind of discharge or a focal kind of abnormality that's more important to you. If you don't wait, you wind up with EEG findings that look very bizarre. . . . Bearing this in mind will save you a lot of time and money."

—PATRICK F. BRAY, M.D., Salt Lake City

MEETINGS

101ST ANNUAL SCIENTIFIC ASSEMBLY of the California Medical Association, February 12-16, 1972. San Francisco Hilton Hotel, Mason and O'Farrell Streets, San Francisco.

PHONOCARDIOGRAPHY PULSE TRACINGS-VECTORCARDIOGRAPHY A WORKSHOP

September 27-30, 1971

This is an intensive four-day program covering in detail the field of phonocardiography and pulse tracings and vectorcardiography. Emphasis will be placed on the values and limitations of these techniques and related areas as applies to the patient's diagnostic problems. Two days will be dedicated to phonocardiography and pulse tracings and two days for vectorcardiography. The morning sessions will be devoted exclusively to individual analysis of tracings by the participants under the orientation of the local and guest faculties. This program is intended for those who wish a close and detailed exposure to the values and the limitations of these techniques.
